

Group 16 // G[or]ton or what?!?

To address the issues facing Gorton's High Street our proposal involves unifying the Gorton Market, Tesco and the High Street to create a central hub or anchor point within Gorton, reinvigorating the Gorton Market by creating an active frontage supplemented by an open-air market to draw people in and addressing the existing hard landscaping of the car park, pavements and roads to create a more pedestrian and cyclist friendly environment. Drawing from precedents such as Altrincham Town Centre and Kensington High Street we have done away with cluttered streets and barriers; the road and pavement have been unified by using modern paving on both to encourage pedestrians to engage with the high street. This is further enhanced with the addition of vegetation along the street to create a more welcoming feeling.

New landscaping promotes greenery and biodiversity in Gorton.

Hyde Street as a shared zone allows for multiple modes of transport.

A street market located outside will attract more visitors and business

Introduction of more cycle routes to promote alternative transport.
