

Group 27 // The Assembly

Our proposal aims to provide a sustainable solution to the homelessness issue, enhance the appearance of the site and create a new anchor point within Harpurhey. We have proposed a modular construction system that can adapt as the town develops. A new permanent anchor point is created as a landmark for the town. This circulates visitors through the high street and into the new market space. The modular units can provide: studio spaces, cafe extensions, market stalls and accommodate the homeless.
