

# Group 46 // Withington Connect

"Withington Connect" aims to conserve and improve the High Street of Wilmslow Road by proposing a connectivity of local businesses. We aim to empower and unify retail and communities to create spaces of social integration, interaction and diversity. We aim to preserve the initial conception of an open marketplace, as well as pedestrianisation of the high street. The addition of a new metrolink line will not only attract people from different locations in Manchester but also create separate access routes to the residents. "Withington Connect" introduces a vibrant, liveable and sustainable community that prioritises human interaction.
